THE
EAGLE LANDING
ASSOCIATION

Community Design Guidelines

Effective January 1, 2007
Dear Owners and Prospective Property Owners,

We believe Eagle Landing is a conveniently located and a wonderful place to live! The Architectural Review Board (Henceforth referred to as the ARB) is a voluntary team of property owners that have been appointed by the Eagle Landing Board of Directors. These individuals share a deep concern for the quality of development and property maintenance at Eagle Landing. The goal of the Eagle Landing ARB is to make your building or remodeling process a smooth and pleasant experience.

For existing owners, it is important that you understand these guidelines BEFORE you start plans for remodeling and/or additions AND as they relate to the ongoing maintenance and upkeep of your home or lot.

For prospective owners, it is important that you understand these guidelines BEFORE the purchase of a home site. Please take the time to thoroughly read these guidelines and share them with your design professional and builder, as applicable. We look forward to working with you to assure that your home will be a welcome addition to The Eagle Landing Community.

Sincerely,

The Members of the Eagle Landing Association ARB

  The Reason for and the Function of the Review Board
The ARB has been established in accordance with the Covenants and Restrictions of the Eagle Landing Association, Inc., with the function of ensuring that development of new homes, remodeling of existing homes and maintenance of existing homes occur in accordance with the Eagle Landing Community Design Guidelines and Restrictive Covenants. These guidelines have been established to assist all property owners in the planning and construction of their new homes as well as improvements to existing homes. These guidelines are here to provide a uniform review process for approval by the ARB, while protecting the investments of all property owners.

Within this packet of information, you will find recommendations and approval levels establishing a standard of environmental compatibility that will protect and preserve the natural character of Eagle Landing. Proposed homes and remodeling of existing homes will be reviewed for compliance with these Design Guidelines. Homes built in accordance with the Design Guidelines should harmonize with the character of Eagle Landing.

A. Permits and Regulatory Agency

In an effort to maintain continuity and adherence to regulations stipulated in the Covenants and Restrictions, ARB approval shall be made prior obtaining permits from the city of Hanahan, Berkeley County, or any other pertinent agency.

B. Overview of the Review Process

Compliance with the guidelines outlined here is essential. You will be able to see how each step in the approval process and the guidelines themselves protect the value of our homes.

1. Approval of Plans
No building of any kind or description, fence or other structure, shall be erected on any lot in Eagle Landing until the proposed building plan specifications, exterior color or finish, site plan, including the layout of driveways and parking, and landscape plans have been approved in writing by the duly appointed representatives. Refusal of approval of plan, location or specification may be based on any grounds, including purely aesthetic conditions, which are the sole discretion of the ARB with the Board of Directors having final say on all refusals.

2. Review Process
A request for review shall be made to the ARB (Contact Capitol Group at 843-529-9690) when the design objectives can be identified in sufficient details to illustrate the special relations, material, exterior appearances, and circulation patterns. The presentation materials must include, but are not limited to, a site plan, a floor plan,
elevations of all four sides, and a landscape plan. Two sets of drawings are required. (One set will be retained). The results of the ARB action will be forwarded to the applicant within 30 days of submittal.
The following is a list of information to be included in the submittal:
A. SITE PLAN - To include property lines, the location and species of all trees ten (10) inches or larger in diameter. The site plan showing access to streets, driveways, walks, patios, grading and drainage. Additionally, the location and identification of special features such as drains, ditches, drives, sidewalks, nearby lagoons, easements, buffers, cart paths etc.

B. COMPLETE CONSTRUCTION DRAWINGS - Which include floor plans, elevations, and details setting forth the requirements for construction, location of external A/C equipment, types of siding to be used, and type of foundation.

C. LANDSCAPE PLAN - Showing location and size of all plants, trees, buffers, mulched areas, grass all surface materials such as concrete, asphalt, etc. Include location of all exterior lighting.

D. SPECIFICATIONS - Including all exterior colors, materials, and special conditions as appropriate, including samples of all.

E. LOCATION OF BUILDINGS - Location of identification of special features such as drains, ditches, drives, sidewalks, nearby lagoons, easements, etc.

F. CASH DEPOSITS - Each Property owner shall pay a construction deposit in the amount of five hundred dollars ($500.00.) This is for assurance that they will comply with the approval plans prior to final acceptance: the owner shall submit a cashier's check to the Eagle Landing Association. During the term of construction, the deposit will be placed in an escrow account. Upon the completion of the residence, in compliance with the ARB guidelines and when a certificate of final approval has been issued by the ARB, five hundred dollars ($500.00) will be returned to the property owner. There will be a two hundred and fifty dollar ($250.00) application fee that will not be refunded.

C. Development Guidelines
The Eagle Landing residence should have the predominant quality of fitting within the natural context of the neighborhood. The generous use of natural materials, color and forms, blending carefully with the existing vegetation and within the neighborhood should be of utmost importance in the design process. Three basic groups of elements must be considered: first, the building form (general shape, height, size, and roof form of the residence). Next, the form articulation (exterior materials and colors, finish, and exterior trim). Finally, appurtenances, such as decks, terraces, and fences. The sensitive treatment of these elements is not tied to any style or motif. In general, it should be realized that the predominant aesthetic features of Eagle Landing are those of a warm, rich, casualness employing natural
materials and colors that blend with beautiful surroundings. The relative size and height of a residence plays an important role in its harmony in the neighborhood. Structures with dominant natural topography and landscape will not be admitted. Wide overhangs are encouraged for both aesthetic and practical reasons. Windows should be carefully proportioned and located to enhance walls in which they are placed. The continuity of the following key design features is of the utmost importance:

1. No vinyl siding in new development.
2. 20% maximum vinyl siding in existing Eagle Landing development.
3. Fences along proposed golf course shall be 4 foot tall and not of solid construction. Wooden fences shall be no more than 4 foot in height with vertical boards each spaced at least 1 inch apart.
4. Roof shingles shall be black or gray architectural type.
5. No sheds permitted.
6. A 20 foot buffer, not counting any cart path, will exist where a new home is adjacent to an existing home.
7. The maximum height of a house shall be 35 feet.
8. Mail boxes shall be constructed of treated 4x4’s painted gray with a regular size black mailbox and 4 inch black numbers. The 4x4 is to be topped with a full copper cap.
9. Sidewalks shall be 4 foot wide.
10. A palmetto tree shall be placed for every three houses.
11. Posts for stop signs and street names will be treated 6 x 6’s painted grey and topped with full copper caps.
12. Siding shall be brick, stucco or hardy plank.
13. Street lamp posts shall be the same as the existing lamp posts in Eagle Landing.

D. Site Construction Guidelines
Guidelines have been set for the construction process. It will be the general contractor’s responsibility to see that his employees as well as his sub-contractors conform to these guidelines. In all cases, the property owner will be accountable to the ARB for the actions of his contractor. All contractors must complete and sign a contractor’s agreement form prior to final approval by the ARB.

1. No clearing will be allowed until City of Hanahan Building Permits has been posted on the site.
2. The contractor shall at all times protect the natural setting of the site.
3. Temporary sanitary facilities are to be provided and shall be located off the street and driveway.
4. A trash dumpster shall be located on each site prior to construction and all trash must be placed in this receptacle. Workers lunch and snack time trash to be picked up daily. The ARB will issue one warning to violators. There will be absolutely NO burning allowed for any reason what so ever. Workers, in cold weather, may use propane-heating
devices. All heating devices must meet legal standards.

5. The contractor is responsible for all heavy equipment damage to public curb and sidewalks. The contractor will be required to repair all damage. Failure to do so will result in a lien being placed upon the residence.

6. In the event the developer does not include sidewalks in his plan, the homeowner will be responsible for their installation upon completion of the residence. Non-compliance will result in a lien being placed on the residence.

7. As per our covenants, Book - R, Volume - 6323, Page - 187, there are construction hours that will be observed. Monday through Saturday, sunrise to sunset. ABSOLUTELY NO work will take place on Sunday. The minimum fee for this violation is $250.00. Repeat offenders will be fined a minimum of $500.00.

E. Submittal Review List

1. Property Owner contact Capitol Group to request an application and a copy of Design Guideline.

2. As soon as the Design Objectives can be identified, the Property owner must contact Capitol Group to request a review.

3. Supply Capitol Group with two sets of plans that would include a floor plan, elevation of all four sides, and a preliminary landscape plan.

4. A request for review should be made to Capitol Group as soon as all of the following are available. (See paragraph B)
   A. Site plan
   B. Location of buildings, etc.
   C. Two complete sets of drawings
   D. Landscape plan
   E. Specifications
   F. Cash or certified funds deposit and application fee
   G. Contractor Agreement Form

F. Before Construction

1. Application Approval with ARB.

2. Site Plan Approval (with ARB signatures) after field inspections of stake out.

3. Working drawings with ARB approval.
4. City of Hanahan Building Permit

5. Contractor’s License for State, County, and City

6. Deposit Certificate

G. During Construction
1. All before construction documentation is required on site and displayed in the appropriate manner.

2. No more than one job sign. Sign may not exceed 36 inches in height and 48 inches in width.

3. Portable toilet suitably located on property.

4. Construction debris receptacle suitably located on job site.

5. Site reviews by ARB

H. Final Approval
1. Site Review and approval by ARB.

2. Any and all outstanding infractions must be cleared up.

3. Return of one set of Plans.

EAGLE LANDING ARB
LANDSCAPE ARCHITECTURAL REQUIREMENTS & RESPONSIBILITIES
OF THE OWNER/BUILDER OF EAGLE LANDING SINGLE FAMILY LOTS

Owner/builder shall:
1. Perform site inventory and analysis - document existing physical conditions, positive and negative features to determine potentials and constraints, i.e., views, existing vegetation (size in diameter of all trees), adjacent properties, utilities, slopes, etc.
2. Provide preliminary site plan and review same with ARB.
3. Develop site plan indicating the following:
   (a). Location and orientation of house site.
   (b). Location and overall dimensions of various design elements such as drives, walks, planters, etc.
   (c). Describe materials and finishes for elements
   (d). Provide conceptual planting for property (buffer if applicable)
4. Meet with ARB to review site plan and conceptual design to finalize concept as provided.
5. Revise and complete final landscape documents.

Eagle Landing Association Solar Panel Policy

The Board of Directors adopts this policy to promote the use of solar energy to produce electricity/solar PV and to ensure uniform installation and design of solar energy systems. The purpose of this policy is to clarify the placement, size and type of structures by limiting the intrusion of solar panels into the natural setting of the Community. The desired outcome is the harmonious blending of solar panels into the natural character of our Neighborhood and Community.

Solar panels shall not be installed or maintained without approval of the Architectural Review Board (the “ARB”). Solar panels must meet the following requirements before they are to be approved by the ARB:

1) Homeowners should first consider all existing structures and landscaping before selecting a site for any proposed solar energy system.

2) Solar panels must be placed so as not to be visible from the front of the home at the streets edge and must be low profile, roof-mounted array. The array must not exceed 8 inches above the roof plane.

3) In promoting conformity throughout the Community, all components of the solar energy system should be integrated into the design of the home. The color of the solar system should be black.

4) The installation of all solar energy for the production of electricity/solar PV shall only be done by a licensed installer or journeyman plumber. Applications submitted to the ARB should include the following:
   a. A diagram “drawn to scale” by the licensed contractor installing the system showing where the system will be installed;
   b. Photos of the roof area where the array will be mounted;
   c. Material to be used and/or manufacturer’s description of the system, photos and/or pictures of the system and color of the system;
   d. Where possible, provide photos of similar existing systems as examples.

5) Piping and electrical connections will be located directly under and/or within the perimeter of the panels, when possible, and placed as inconspicuously as possible when viewed from all angles.

6) All panels and painted surfaces will be kept in good repair. The Property Owner is responsible for any damage needing fixing. Repairs to the system must be made within thirty (30) days.

7) Changes to adjacent property should not impede an existing or soon-to-be-installed solar panel system or interfere with any existing solar energy easement.

A variance to certain sections of these guidelines may be granted by a majority vote of the Eagle Landing Association, Inc Board of Directors if compliance with these guidelines would significantly increase the purchase price of the solar panel system or significantly decrease its performance or efficiency.

Eagles Landing Association: Solar Policy Adopted by the Board of Directors on __4/27/2017__
